ABOUT THE CLIENT

Jabil is a U.S. based global manufacturing conglomerate that offers world-class services to its clients and the customers. The headquarters of the company is located in St. Petersburg, Florida. Jabil is one of the largest companies that are located in the Tampa Bay area and the third-largest contract manufacturer across the globe. The conglomerate is known for its expertise in the fields of Automotive, Capital Equipment, Computing & Storage, Digital Home Solutions, Energy, Networking, Telecommunications, Point of Sale, and Printing Solutions. All the domains are best in their fields and provide world-class services to the consumers worldwide.

The name of the company, Jabil, was derived from the names of its two founders, James Golden and Bill Morean who founded the company in 1966. Incorporated in the year 1969, the initial product manufactured by the company were PCB(s).

At present, Jabil has 90 plants running in 23 different countries serving the multiple hundreds of industry pioneers.

GOALS OF THE PROJECT

Jabil needs no introduction when it comes to justifying its global presence. Jabil is one of the Fortune 500 companies and is climbing the ladder of success with an unmatched rhythm. Despite being a renowned conglomerate, the company had this thin link that was pushing its reach to several Asian countries. To tackle this situation, the company approached us where we provided appropriate and precise solutions to tackle their business obstacles. Following is a brief description of our goals that were to be achieved to ensure a smooth and free flow of business for Jabil from Asian and other Asia-Pacific countries:

- To Developing a Multi-Lingual Website for Asian and Asia Pacific Countries: Jabil Asia- It will set a benchmark for the industry giant as Asian Countries hold rich opportunities for professional and professional workmanship and also provide a dense business market.

- To Upgrade the Homepage: To create more links and arrange the website content in a user-friendly manner. Being a multi-industry giant, Jabil is just like a multi-cuisine platter and to serve the right delicacy to the right people, redesigning of the homepage was needed. This will sort the valuable information available on the website and can be used by any visitor for knowing Jabil further well.

- To Upgrade the Trends Page: To spread the awareness among users, clients, and visitors about the latest business trends and milestones of Jabil- World economy is growing fast and making people busier. To save the time and effort of the visitors, clients and users, the catchy and to the point trends page was a must-have.

- To Upgrade the categories: To make the website more user appropriate and navigate them easily to the desired industry categories directly. Jabil is a pioneer in several industry segments and to engage the business virtuosos from different industries, it needed to be sorted and well-defined segments of different industries on its website.
CHALLENGES

At Clavax, we take pride in accepting the toughest of the challenges and converting them into the greatest of the digital solutions. With a number of grave challenges from Jabil, we tackled each one with our skills and dedication to providing perfect results. Following are the challenges that we faced while developing the business solutions for Jabil:

- To deliver the products within a short duration of time period
- To build up a trust bridge between Jabil and Clavax
- To provide a CMS based website that is lightweight and can be managed with minimum efforts
- To strictly follow the Google Material Design guidelines while developing the HTML content
- To create multilingual websites for a better UI
SOLUTIONS

- At Clavax, our team toiled to provide smooth and bug-free products to Jabil within a very short duration of time. There was no room for delayed results thus proving that Clavax provides timely and bug-free products to its valued clients.

- Jabil is a renowned conglomerate and it was a great opportunity for Clavax that we got a chance to develop products for the company.

- The websites were rich in content and features. To provide the timely upgradation of the website, we are developing appropriate business solution for Jabil to assure smooth flow of data and information among the client, users, and their customers.

- To work while following the guidelines of Google Material Design Instructions to assure 100% trustworthy and consolidated services.

- Working on multilingual website was not that much a challenge but we had to assure the accuracy of the content available on the website with each update
